Additions to Bishop Montgomery Completed

Completion of two classroom additions and a new boys' classroom building at Bishop Montgomery High School, 5430 Torrance Blvd., Torrance, is announced by Rt. Rev. Msgr. Patrick Dignan, superintendent of Catholic schools.

McNeil Construction Co. built the \$830,000 increment which was designed by Albert C. Martin & Associates, architects and engineers.

Each of the three single-level, wood frame and stucco units follows the simple functional lines of the original structures built by McNeil in 1957.

Large window areas permit maximum use of natural light, and additional illumination is provided by surface-mounted, fluorescent fixtures.

Special design features include exposed wood ceiling beams with

acoustical tile ceiling. Some classrooms were planned to double as audio-visual rooms.

With the new classroom building and additions, which include scientific facilities and equipment, the total number of classrooms has been increased to forty and permits the high school to accommodate twice its present 600-student capacity. Existing campus structures include an administration building, chapel, study hall, library, book store,

locker room building and athletic field.

Connecting covered walks link the new classroom building to the chapel and administration building. Robert Herrick & Associates was landscape architect.
